Isotonic projection in quantile space
Proximal score in residual space
$\tau = 0.45$: inactive constraint
$C_{c,\tau} = 0.000$
$\psi_{c,\tau}(Q_c(q))$
quantile $Q_c$
shifted quantile $Q_c - \tau\omega$
isotonic fit $h_{c,\tau}$
identity
proximal score $\psi_{c,\tau}$
CDF score $4\tau(\Phi(v) - 1/2)$
score
$\tau = 0.90$: active constraint
$C_{c,\tau} = 1.605$
central interval projected to 0
identity core: $\psi_{c,\tau}(v) = v$
quantile level $q$
effective residual $v$
